EDUCATION

Centre College

Expected Graduation: May 2028

B.S. in Data Science

- **Relevant Coursework:** Database Management (SQL), Data Visualization, Statistical Modeling, Statistics, Programming and Problem Solving in Python, Data Science & Analytics (Applied Machine Learning), Financial Accounting, Economics, Marketing, Calculus I–III, Linear Algebra & Probability Theory (Planned - Junior Fall)
- **Lincoln Scholar:** One of 10 scholars selected from 1000+ global applicants for a prestigious four-year full-ride scholarship with a 1.8% acceptance rate

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Playwright), SQL, R

Data Visualization & BI Tools: Power BI, Tableau, Dashboard Development

Analytics & Experimentation: A/B Testing, Logistic Regression, Data Analytics (*IBM Data Analytics Certificate - In Progress*)

Tools & Technologies: Excel (Pivot Tables, VLOOKUP, Data Cleaning), Power Query, Google Analytics 4, ETL, Git/GitHub, Hootsuite, Jupyter Notebook, Anaconda (Proficient in Google G-Suite & Microsoft Office Suite)

Research Tools: Literature Review, Data Interpretation, Technical Writing, Presentation Development

EXPERIENCE

Marketing Data Analyst Intern

February 2026 - Present

Centre College

- Analyze behavioral data from 100K+ website users using Google Analytics 4 and Excel, evaluating user journeys from the Go & Do campaign landing page through session duration, scroll depth, and navigation paths
- Build Tableau dashboards to visualize user behavior insights, and communicate recommendations to stakeholders to guide improvements in campaign performance, recruitment strategy, and user engagement

Growth Marketing Analyst Intern

February 2026 - Present

BTA Sports

- Collaborate with marketing team to analyze CTR, reach, and engagement metrics in TikTok Studio, driving 1K+ views overnight, and run A/B tests on video hooks that increased views 20× (30 over two weeks → 700 overnight)
- Build Tableau dashboards and performance reports to track content metrics and communicate findings to stakeholders, improving reporting efficiency by 40%

Data Analyst Intern

January - February 2026

Open Development Cambodia

- Built an automated Python scraping pipeline (Playwright, Pandas) to collect and structure 2,000+ business records, cutting manual collection time by 80%
- Cleaned and standardized multi-source datasets in Power Query and Python, improving usability by 30%

PROJECTS

Credit Risk Modeling & Default Prediction | *Python (Pandas, Scikit-learn)* | GitHub

- Co-developed a logistic regression model on 307K+ applicants and 1.4M+ records, achieving 0.81 recall and 0.75 ROC-AUC; financial analysis estimated \$1.2B in protected loan losses on a 61K test set
- Preprocessed data, engineered features, and performed exploratory analysis in Python, identifying key credit risk drivers (e.g., debt utilization, payment delays)
- Evaluated the model using cross-validation and confusion matrix, and presented findings to professors and classmates, translating model outputs into credit risk insights and financial decision-making implications

Fine-Tuning ResNet-18 for Pet Breed Classification | *Python (PyTorch, Scikit-learn)* | GitHub

- Co-developed a two-stage PyTorch pipeline to fine-tune an ImageNet-pretrained ResNet-18 on Oxford-IIIT Pets (37 classes), achieving 89.8% test accuracy
- Ran ablation studies (AdamW vs. SGD; head-only vs. full fine-tune) and per-class error analysis with confusion matrices and precision/recall/F1 to identify the model's hardest classes
- Evaluated robustness on self-collected out-of-distribution images, analyzing failure modes tied to lighting, framing, and background variation
