EDUCATION

Centre College

Expected Graduation: May 2028

B.S. in Data Science

GPA: 3.5/4.0

- **Relevant Coursework:** Data Manipulation in SQL, Data Visualization, Statistical Modeling, Statistics, Programming and Problem Solving in Python, Data Science & Analytics (Applied Machine Learning), Marketing, Calculus I-III, Linear Algebra & Probability Theory (Planned - Junior Fall)
- **Lincoln Scholar:** One of 10 scholars selected from 1000+ global applicants for a prestigious four-year full-ride scholarship with a 1.8% acceptance rate

EXPERIENCE

Regenstrief Institute

June 2026 - Present

Data Analyst Intern

- Analyze and transform 200K+ longitudinal electronic health records (EHR) using SQL and Python to support predictive analytics and clinical initiatives for early sepsis detection in Transplant Intensive Care Unit (TICU) patients
- Develop interactive Power BI dashboards to visualize patient outcomes, sepsis trends, and clinical performance metrics, enabling research scientists and clinicians to make data-driven decisions
- Partner with research scientists, clinicians, and data analysts to extract, validate, clean, and organize hospital administrative and EHR data using SQL, improving data quality for clinical analytics and reporting

Centre College

Feb - May 2026

Marketing Analyst Intern

- Analyzed behavioral data from 100K+ website users using Google Analytics 4 and Excel, identifying user engagement trends that informed recruitment strategy and business decision-making
- Designed interactive Tableau dashboards to communicate campaign KPIs and user behavior insights, supporting stakeholders in evaluating recruitment and marketing performance

BTA Sports

Feb - May 2026

Marketing Analyst Intern

- Analyzed content performance metrics, including CTR, reach, and engagement, using TikTok Studio and Excel, performing A/B testing that increased video views 20x (30 to 700 overnight)
- Developed Tableau dashboards and automated performance reports that improved reporting efficiency by 40% and supported data-driven marketing decisions

Open Development Cambodia

Jan - Feb 2026

Data Analyst Intern

- Developed an automated ETL pipeline using Python (Playwright, Pandas) to collect and structure 2,000+ business records, reducing manual data collection time by 80%
- Cleaned, standardized, and transformed multi-source datasets using Power Query and Python, improving data quality and usability for downstream reporting and analysis by 30%

PROJECTS

Credit Risk Modeling & Default Prediction | Python (Pandas, Scikit-learn) | GitHub

- Co-developed a logistic regression model on 307K+ applicants and 1.4M+ records, achieving 0.81 recall and 0.75 ROC-AUC; financial analysis estimated \$1.2B in protected loan losses on a 61K test set
- Performed data cleaning, feature engineering, and exploratory analysis using Python to prepare large financial datasets for predictive modeling and business analysis
- Evaluated model performance using cross-validation and confusion matrices and presented analytical findings to academic stakeholders, translating technical results into business insights

TECHNICAL SKILLS

Business Intelligence & Visualization Power BI, Tableau, Dashboard Development, Data Visualization, Power Query
Programming & Analytics SQL, Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Playwright), R, A/B Testing, Logistic Regression, Google Analytics 4
Data Management: ETL, Data Cleaning, Data Wrangling, Excel (PivotTables, VLOOKUP, Data Validation)
Tools & Technologies: Git/GitHub, Jupyter Notebook, Anaconda, Microsoft Office Suite, Google Workspace
