EDUCATION

Centre College

Expected Graduation: May 2028

B.S. in Data Science

GPA: 3.5/4.0

- **Honors:** full-ride scholarship with a 1.8% acceptance rate (One of 10 scholars selected from 1000+ global applicants)
- **Courses:** Data Manipulation, Data Visualization, Statistical Modeling, Advanced Python, Data Analytics, Machine Learning, Modern Calculus I-III, Linear Algebra, Probability Theory

EXPERIENCE

Regenstrief Institute

June 2026 - Present

Data Analyst Intern

- Analyzed 238K+ longitudinal EHR vital-sign observations across 1,182 Transplant ICU admissions to evaluate sepsis alert performance and identify over-triggering in the transplant population
- Prepared and analyzed clinical data using Python and SQL, addressing key missingness, engineered features, and evaluated 6 sepsis triggers against 5 gold-standard definitions across 838 patients with SOFA rise information
- Built Power BI dashboards with DAX to compare trigger sensitivity, specificity, and PPV, identifying over-triggering and collaborating with clinicians and research scientists to interpret findings

Centre College

Feb - May 2026

Data Analyst Intern

- Evaluated 100K+ website user interactions to identify engagement trends and inform recruitment strategies, contributing to an 18% increase in campaign engagement
- Developed interactive Tableau dashboards to monitor campaign KPIs and communicate insights, increasing reporting efficiency by 30% and enabling stakeholders to make faster, data-driven recruitment decisions
- Analyzed web analytics data using Google Analytics 4 and Excel, reducing manual reporting time by 20%

BTA Sports

Feb - May 2026

Data Analyst Intern

- Assessed content performance metrics and conducted A/B tests using TikTok Studio and Excel, identifying strategies that increased video views 20x from 30 to 700 overnight
- Analyzed and organized social media performance data using Excel and TikTok Studio to optimize content performance
- Built Tableau dashboards to optimize content strategy and reporting efficiency by 40%

Open Development Cambodia

Jan - Feb 2026

Data Analyst Intern

- Automated processing of 2,000+ business records, reducing manual data collection time by 80%
- Built an automated ETL pipeline using Python, Playwright, and Pandas to collect and structure 2,000+ business records
- Cleaned and standardized multi-source datasets using Python and Power Query, improving data quality by 30%

PROJECTS

Credit Risk Modeling & Default Prediction | Python (Pandas, Numpy, Scikit-learn) | GitHub

- Developed a logistic regression machine learning model using 307K+ applicants and 1.4M+ financial records, achieving 0.81 recall and 0.75 ROC-AUC through predictive modeling and performance evaluation
- Conducted data preprocessing, feature engineering, and exploratory data analysis in Python to clean, transform, and prepare large-scale datasets for statistical modeling
- Evaluated the model using cross-validation and confusion matrix, and presented findings to professors and classmates, translating model outputs into credit risk insights and financial decision-making implications

TECHNICAL SKILLS

Programming & Data Analysis: SQL, Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Playwright), R
Data Visualization & BI Tools: Power BI, Tableau, Dashboard Development
Analytics & Experimentation: A/B Testing, Logistic Regression
Tools & Technologies: Excel (Pivot Tables, VLOOKUP, Data Cleaning), Power Query, Google Analytics 4, ETL, Git/GitHub, Jupyter Notebook, Anaconda (Proficient in Google G-Suite & Microsoft Office Suite)
